Public Health for the Future of Humanity: Analysis, Advocacy and Action

12-16 October 2020
Virtual Edition

Co-Chairs:
Walter Ricciardi, Italy
Carlo Signorelli, Italy

George C. Benjamin, USA
Iveta Nagyova, Slovakia
Michael Moore, Australia
Sabina F. Rachid, Bangladesh
Luís Eugênio de Souza, Brazil
Sheila Tlou, Botswana
PLENARY AND PARALLEL PROGRAMME: TUESDAY 13 OCTOBER 2020

Join Plenary Sessions and World Leadership Dialogues in the Auditorium and Workshops and Oral sessions in the Breakout Rooms.

| TRACKROOM | A | B | C | D | E | F | G | H | I | J | K | L | M | N | O | P | Q | R | S | T | U | V | W | X | Y | Z |
| Track     | COVID-19 pandemic | All for health, health for all | Digital health, health information and communication | Environmental health, urban health, climate change, health determinants and Sustainable Development Goals | Health promotion | Health systems research, Universal Health Coverage | Health workforce training and capacity development | Infectious diseases, AMR, vaccination and emergency preparedness | Public health advocacy, policy and politics | Public health monitoring and reporting / Non-communicable diseases | Public mental health / Vulnerable groups, minorities and migrants’ health |
| 8.45-9.45 | PL1 - What happened to the Enlightenment? |
| 13.30-14.30 | OC - Opening ceremony WCPH 2020 |
| 18.15-19.15 | |
## PLENARY AND PARALLEL PROGRAMME: WEDNESDAY 14 OCTOBER 2020

Join Plenary Sessions and World Leadership Dialogues in the Auditorium and Workshops and Oral sessions in the Breakout Rooms.

Useful information

As you enter the Virtual Platform, we invite you to check the Resources window at the Help Desk to get all the useful information to navigate and participate in the event.
If you need technical assistance, click the 'Technical Support' screen and chat directly with our support staff.

Live presenters
Please note that, if you are a live speaker, panellist or chair of WCPH2020, you will receive, in a separate email, the link to access the live session as a presenter. Each link is valid for the indicated session only. Remember to access the link 15 minutes before the start of your session.

Attendees
Each streamed session will have a dedicated session chair who will moderate the questions and comments to the presenter(s). The session chair will introduce herself/himself to the virtual audience at the beginning of the session. If you have a question or comment, write it in the chat box. It will be forwarded by the chair to the presenter and the on-site audience, either at the end of the Q&A part, or when/if the presenter pauses to take questions.

Profile Card
Use the Edit Registration Info at the right top of your screen to complete any missing details such as Company Name or Job Title. Use the Profile Settings to decide the registration details you would like to share at your Profile Card.

Congress Bag
Add specific documents, links, videos and other contents to your personal congress bag by clicking at the right of the content on the briefcase icon.

Announcements
Messages appear at the top of the environment and include useful information or links to highlighted agenda items or specific contents.

Share!
Remember to follow us on social media and to share your experience using the official #wcph2020.

Certificate of Attendance
Certificate of Attendance will be available from Monday 19th October. Please enter your User Area into the Registration link and log in using your credentials.

Post Congress – On Demand Sessions
Scientific posters and all sessions will be available on-demand until October 31st at www.wcph2020ondemand.com
**Wednesday 14th October**

13.15 – 14.15 CET  
**Protecting the most vulnerable against 2020–2021 influenza: the opening move**  
**Organiser:** Seqirus

Currently there is an official start to influenza surveillance activities in several countries of the Northern Hemisphere. The 2020/21 influenza season is expected to be exceptional, as influenza virus will co-circulate with the SARS-CoV-19. In this Symposium different stakeholders are invited to discuss the most appropriate innovative tactics to minimize the burden of both influenza and COVID-19 from the global Public Health perspective.

19.15 – 19.50 CET  
**True Burden of Influenza and Prospects for Prevention in Older Adults**  
**Organiser:** Sanofi Pasteur

The Flu symposium is structured in two parts of which the first part, related by Professor Gaetan Gavazzi, focuses attention on the burden of influenza under the tip of the iceberg and its cardiovascular complications in particular in the elderly population; the second part, managed by Dr. Sandrine Samson, enhances the excellent characteristics of the new high-dose vaccine which represents an optimal solution for the prevention of influenza and its complications with its indication currently valid for the elderly from 65 years of age.

**Thursday 15th October 2020**

11.00 – 12.00 CET  
**Disrupting Blood Policy**  
**Organiser:** International Foundation for Patient Blood Management (IFPBM) & ViforPharma

Some five million people receive blood transfusions in Europe annually. Ensuring ample blood supplies are available for those who need them most has significant public health implications. Patient Blood Management (PBM) is a multi-disciplinary healthcare approach to optimise the care of patients who might need a blood transfusion. The purpose of this session would be to raise awareness of PBM at the European level and reflect on how stakeholders, national governments, and the EU can support it. PBM is not limited to a single discipline, therapy area, or disease. Owing to its widespread applicability and impact, it is an issue of public health. Several member states have already implemented PBM healthcare strategies in order to encourage others to do the same.

13.15 – 14.15 CET  
**Defeating meningococcal meningitis is in our hands! How policy makers are successfully implementing routine vaccination campaigns across all ages**  
**Organiser:** Sanofi Pasteur

In a world eagerly waiting for a vaccine that will allow us to resume normal life, join Sanofi Pasteur for an interactive session with an expert panel. Experts will be looking at how countries are leading the way in implementing routine vaccination campaigns as a way to protect their populations of all ages against meningococcal meningitis, a largely vaccine preventable disease.

13.15 – 13.45 CET  
**Operational service on climate change impacts to public health**  
**Organiser:** ECMWF Copernicus Services

Human health is strongly impacted by climate change. To monitor and project future effects, the C3S European Health Service provides climate-health indicators concerning heat and cold stress, vector-borne disease, and allergenic pollen.

**Friday 16th October 2020**

13.15 – 14.15 CET  
**Eye Health: 2020 Year of Vision – Addressing Eye health Needs in a Post-COVID World**  
**Organiser:** European Coalition for Vision

The International Agency for the Prevention of Blindness (IAPB) Vision 2020 – right to sight initiative launched in 1999 to eliminate avoidable blindness by 2020 has done a lot of good but has not eliminated avoidable blindness as originally hoped. Ageing populations and changes in age structure have outpaced the impact of interventions to reduce the prevalence of eye disease, in particular cataract, uncorrected refractive error, glaucoma and macular degeneration. Over the last 3 decades the numbers of blind people have increased by 50% globally and those with moderate/severe vision impairment by 90%.

13.15 – 14.15 CET  
**Public health responses and government measures to combat the COVID-19 pandemic in China**  
**Organiser:** Chinese Preventive Medicine Association

What are the inspirations to the world from China’s experiences on COVID-19 prevention and control? How to develop effective international cooperation on public health?
Companies description

Seqirus
Seqirus is part of CSL Limited (ASX:CSL). As one of the largest influenza vaccine providers in the world, Seqirus is a major contributor to the prevention of influenza globally and a transcontinental partner in pandemic preparedness. Seqirus operates state-of-the-art production facilities in the US, the UK and Australia, and manufactures influenza vaccines using both egg-based and cell-based technologies. It has leading R&D capabilities, a broad portfolio of differentiated products and a commercial presence in more than 20 countries. For more information visit www.seqirus.com.

ECMWF Copernicus Services
Copernicus is the European Union’s flagship Earth observation programme that delivers freely accessible operational data and information services for policymakers, public authorities, businesses, citizens and scientists alike, with reliable and up-to-date information related to environmental issues.
The European Centre for Medium-Range Weather Forecasts (ECMWF) has been entrusted to operate two key parts of the Copernicus programme.

Pfizer Inc.: Breakthroughs that change patients' lives
At Pfizer, we apply science and our global resources to bring therapies to people that extend and significantly improve their lives. We strive to set the standard for quality, safety and value in the discovery, development and manufacture of health care products. Every day, Pfizer colleagues work across developed and emerging markets to advance wellness, prevention, treatments and cures that challenge the most feared diseases of our time.

Sanofi Pasteur
WE BELIEVE IN A WORLD IN WHICH NO ONE SUFFERS OR DIES FROM A VACCINE PREVENTABLE DISEASE.
For over 100 years, Sanofi Pasteur, the vaccines global business unit of Sanofi, has been committed to extending the life-saving power of vaccination as broadly as possible. We are proud our vaccines can help protect us and our loved ones from a wide range of severe infectious diseases, at every stage of life. We are fully committed to bring our world-leading expertise in vaccines to help control the COVID-19 pandemic.

GSK
GSK is a science-led global healthcare company with a special purpose: to help people do more, feel better, live longer.
At GSK we have 3 global businesses that research, develop and manufacture innovative pharmaceutical medicines, vaccines and consumer healthcare products. GSK has been in Italy for more than a century, with 3 production plants, a research center for vaccines and a high specialized centre for artwork production– all of them with a global importance.
ViiV Healthcare represents our commitment in HIV/AIDS treatments with a robust pipeline under development while GSK ConsumerHealthcare, based in Baranzate (Milan), deals with OTC drugs and consumer products, with a focus on oral health, pain and inflammation, respiratory, dermatology, gastro-nutrition.
Science is resilient. It can overcome diseases, create cures, and, yes, even beat pandemics. It has the methodology and the rigor to withstand even the most arduous scrutiny. It keeps asking questions and, until there’s a breakthrough, it isn’t done. That’s why, when the world needs answers, we turn to science. Because in the end, Science will win.

Scientific discoveries are made possible by the hundreds of thousands of people who participate in clinical trials. Learn more at www.pfizer.com/ClinicalTrials
We are living in a world where the absence of a Covid-19 vaccine is heavily felt. Sanofi Pasteur is hosting a panel of experts who will be taking a close look at vaccination programs for invasive meningococcal disease (IMD), a largely preventable disease.1

Join us for the interactive session where you can get involved in the discussion around how countries are leading the way in implementing routine vaccination campaigns as a way to protect their populations of different age groups against IMD.

Thursday 15th October. 13.15 -14.15 CET

Participants:

Gary Finnegan – Moderator
Editor, Vaccines Today; Board Member of the Coalition on Life-Course Immunisation

Elena Moya – Panellist
President of the AEM (Asociación Española contra la Meningitis) and Coordinator for Europe and Africa, Confederation of Meningitis Organisations

Paolo Bonanni – Panellist
Professor of Hygiene in the Faculty of Medicine, University of Florence, Italy

Pablo Bonvehí – Panellist
Head of the Infectious Diseases and Infection Control Section at University Hospital CEMIC, Argentina

Defeating meningococcal meningitis is in our hands!

How policy makers are successfully implementing routine vaccination campaigns across different age groups.

Immunization programs with MenACWY vary widely from country to country.2

To learn more about routine IMD vaccine recommendations, join our event:

Defeating meningococcal meningitis is in our hands!

How policy makers are successfully implementing routine vaccination campaigns across different age groups

Thursday 15th October, 13.15 -14.15 CET
