1. EUPHA update

European Health Information Initiative expands by 7 members at 4th Steering Group Meeting

Georgia, Lithuania, Malta and Portugal are the latest Member States to be welcomed to the European Health Information Initiative (EHII) alongside new institutional members Public Health England (PHE), the **European Public Health Association (EUPHA)** and the Swiss Tropical and Public Health Institute. EHII now has 21 members who attended the meeting on 22 and 23 March 2016 at UN City in Copenhagen, Denmark.

The meeting was characterized by an emphasis on action with progress made on many fronts including the establishment of formal links with the European Union funded BRIDGE Consortium (Bridging Information and Data Generation for Evidence-based Health policy) and updates on joint data collection with Eurostat and the Organisation for Economic Co-operation and Development. <http://www.euro.who.int/en/data-and-evid...>

EUPHA is pleased to be an active supporter of the following conferences:

3rd International Conference on Law Enforcement and Public Health (LEPH2016)

Learn more about LEPH2016 and register at www.leph2016.com. The conference will be held at the Meervaart Centre, Amsterdam from 2 - 5 October 2016. More information about the invited speakers go to www.leph2016.com/program/invited-speakers/.

6th European Conference on Migrant and Ethnic Minority Health, EUPHA MEMH 2016

Oslo, 23-25 June 2016

Theme of the 6th European Conference on Migrant and Ethnic Minority Health is '**Equity – the Policy Practice Gap**'. Plenary sessions and presentations will focus on socio-demographic and political determinants for health and the policy environment with relevance for migrants, ethnic minorities, asylum seekers, refugees, undocumented migrants. Other topics include: access and quality of health care services; disparities and inequities, social exclusion and marginalization, health system responsiveness to diversity empowerment and levers for change, etc.

More information: [EUPHA MEMH 2016](http://www.eupha.org/eupha-memh-2016).

12th World Conference on Injury prevention and safety promotion (from research to implementation)

Organised by the National Institute for Health and Welfare from 18 Sep 2016 - 21 Sep 2016 / Tampere, Finland

More information: <http://www.safecommunities.org.nz/events/12th-world-conference-injury-prevention-and-safety-promotion-safety-2016>

2. European Public Health Conference

**9th European Public Health Conference: All for Health, Health for All
Austria Centre Vienna, 9 - 12 November 2016**

4th EPH Pre-conference on the Patient perspective in Health Care 'Patient participation in health care research and innovation'

Wednesday 9 November 2016, Austria Center Vienna

In the past decades the active contribution of patients and clients to health care research and innovation has become an important theme. Their input is relevant because, if health care is to become more patient-centered, it is essential to work together with patients and clients as partners from early on. Involving patients in research and innovation projects is likely to increase validity, feasibility and future acceptability.

However, there are several levels and strategies regarding patient participation. They vary from including individual patients as partners in the research or innovation team to organizing representative panels (e.g. NICE Citizens Council). This leads to another kind of input and different impact on projects. Some strategies are also more successful than others.

Furthermore, not every person is motivated or has the skills to participate actively. This leads to inequalities in patient participation and involvement.

In this Pre-conference, we want to share research and experiences regarding patient or client participation in health care research and innovation projects (e.g. designing and implementation of interventions, organizational innovations). Key-note speakers from the Netherlands and the UK will also address these topics.

Abstracts can be [submitted](#) before May 1, 2016 through the EPH website.

The Pre-conference is organised by NIVEL (Netherlands Institute for Health Services Research) and the National Health Care Institute (Zorginstituut Nederland).

Workshop submission

Are you planning to submit a workshop to Vienna 2016? If you are, please note that you can now also select whether you are planning a regular workshop or a panel discussion. Please also note that for panel discussions, we need the contact details of each panelist. With this extra information, you will help us in setting the programme and avoiding overlap of speakers and panelists.

Workshop [submission](#) is still possible until 1 May 2016

3. EUPHA members update

French Society of Public Health: report on ageing

The SFSP has just published a report on ageing.

<http://www.sfsp.fr/dossiers/dossiers.php...>

News from SESPAS, the Spanish Society of Public Health and Health Administration

In the last two months, SESPAS has been involved in several issues. Early March the Spanish society mediated in the matter of the chickenpox vaccine, both in the [newspapers](#) as well as in a [letter to the Government](#), and published a statement regarding the possible introduction of [pre-exposure prophylaxis of HIV](#). Furthermore, SESPAS also contributed to a [newspaper article on infant diabetes](#) and highlighted the need for public health measures to restrict the amount of sugar in children's food. Regarding the debate and confusion surrounding the October 2015 Decree restricting Nurses' prescription, SESPAS has published a [statement](#) that proposes to derogate the Decree and organize a comprehensive working group including scientific societies to study the evidence and potential impact of the reorganizational measures proposed. In April SESPAS organized, together with the

Organización Médica Colegial, a [conference on iatrogenesis](#) in which the deleterious effects of medicine and the ways of preventing and analysing them were discussed ([video of the conference](#)). SESPAS also collaborates with the Ministry of Health in the development of the so called “[Strategy of the NHS for health promotion and prevention](#)” as part of its scientific committee. Together with For more information, please visit our website <http://www.sespas.es/>

4. European Journal of Public Health

The [European Journal of Public Health](#) is a multidisciplinary journal in the field of public health. The EJPH is published bimonthly. The journal provides a forum for discussion and debate of current international public health issues with a focus on the European region. In 2014, the impact factor of the journal is at 2.591. The 5-year impact factor is 2.512. The EJPH is the official journal of EUPHA.

5. Call for proposals, job opportunities

A research chair position in social and human sciences applied to cancer (to be based at Lille, North of France)

The French National Cancer Institute in partnership with the University Lille 3 and the French cancer research sites SIRIC ONCOLille, is opening a research chair position in social and human sciences applied to cancer

This research chair is designed to help promote and strengthen fundamental and applied research in social and human sciences in the field of oncology by supporting the interactions with biomedical and clinical disciplines and by delivering a high-level training for students and professionals.

This chair is expected to contribute to the dissemination of knowledge and innovation in oncology for the benefit of patients and their caregivers. Interactions with the other French cancer centers research sites are expected.

The position is open to academics and researchers from France and other countries with a strong scientific background in Social and Human Sciences.

Deadline for applications is 12th September 2016.

More information (in french) is available at <http://www.e-cancer.fr/Institut-national-du-cancer/Appels-a-projets/Appels-a-projets-en-cours/Chaire-de-recherche-en-SHS-2016>

For any scientific question, please contact: Pr Véronique Christophe, Lille 3 University
veronique.christophe@univ-lille3.fr

European Commission Initiative on Breast Cancer (ECIBC) call for experts

The European Commission Initiative on Breast Cancer (ECIBC) is pleased to announce
A CALL FOR EXPRESSION OF INTEREST FOR EXTERNAL EXPERTS

to support the development of the *European Breast Guidelines* and of the future *Quality Assurance Scheme for breast cancer services*. For more information on the project please visit our [web page](#).

The profiles needed include:

- General practitioner
- Guideline developer methodologist
- Clinical pharmacist (oncology experience required)
- Nutritionist (experience on cancer required)
- IT scientist with experience in cancer information systems
- Rehabilitation professional (e.g. physiotherapist with experience in lymphedema, social worker, etc.)
- Breast cancer pathologist
- Radiographer

Please note that a single expert may cover more than one competence.

Deadline for applications: 10 May 2016 (Midnight CET).

Please find all relevant information to apply at: <http://ecibc.jrc.ec.europa.eu/-/call-for-expression-of-interest-for-external-experts>

Cooperative Research Group for Evidence-Based Public Health: research associate

Post-Doc / Research Associate, 1 full-time position for 3 years

Expected starting date: June 1st, 2016 (negotiable)

Applications are reviewed on a rolling basis until position is filled.

The University of Bremen (Institute for Public Health und Nursing Research) and the Leibniz-Institute for Prevention Research and Epidemiology - BIPS GmbH initiated jointly a Cooperative Research Group for Evidence-Based Public Health. The interdisciplinary research program intends to apply quantitative and qualitative research approaches to policy relevant research questions, in particular concerning life-style related risk factors (e.g. obesity, alcohol, smoking) for chronic diseases.

The successful applicant will have experience in—or show the capacity of—conducting policy relevant (population-level) public health research. The role of the applicant in the research group is

- participating in the general research work of the research group
- collaboration on research proposals for external grants
- pursuing own research topics which fit into the general framework of the research group

The applicant should have experience in one or more of the following research topics:

- modelling or projecting population-level health consequences of changes in risk factor exposure
- comparative cost-effectiveness analysis for population level interventions
- public health economics
- analysis of household-level data for policy analysis

The position requires a (nearly completed) PhD or equivalent publication experience in one of the following or related areas:

- Economics
- Health Economics / Public Health
- Demography / Statistics

Candidates with little or no background in public health but strong expertise in economic or quantitative modelling are encouraged to apply.

There are no teaching obligations.

We welcome applications from highly qualified and motivated early-career scientists of all nationalities.

Disabled applicants with identical technical and personal qualification will be given preference.

The applicant will be employed full time by the BIPS.

Please visit also our homepage: <http://www.ebph.uni-bremen.de/> Direct any inquiries to Prof. Dr. Stefan K. Lhachimi (Lhachimi@BIPS.Uni-Bremen.de) are welcome.

If you are interested, please send your complete application: cover letter, curriculum vitae, copies of key publications (English, peer reviewed) and details of three contactable referees as soon as possible via email, quoting the reference number **A06/16** until **May 1st, 2016** to

Leibniz-Institut für Präventionsforschung und Epidemiologie – BIPS GmbH

Personalverwaltung: Michaela Modde, Achterstraße 30, 28359 Bremen, modde@bips.uni-bremen.de

6. Interesting news

Graphic images may not scare smokers off cigarettes, says study

Images of disease and suffering should move smokers to kick the habit -- at least, that's the thinking behind graphic warning labels used on cigarette packages in much of the world.

<https://www.sciencedaily.com/releases/20...>

When Air Quality Improves, So Do Kids' Asthma Symptoms

Declining levels of air pollution in Southern California were linked to reduced rates of asthma and other respiratory conditions in children, a small longitudinal study showed.

Reductions in ambient air pollution over the course of 20 years were associated with significant reductions in bronchitic symptoms among all children. A 47% decrease in levels of particulate matter was linked to a 32% reduction in the likelihood of bronchitic symptoms in 10-year-old children with asthma (OR 0.68, P=0.002) and a 21% (OR 0.79, P<0.001) reduction among 10-year-olds without asthma, reported Kiros Berhane, PhD, of the University of Southern California in Los Angeles, and colleagues.

Zika Virus Can Cause Brain Defects In Babies, CDC Confirms

After months of hesitation, U.S. health officials now say that the Zika virus is indeed the cause of severe brain damage in the infants of some women who were infected with the virus during pregnancy.

A CDC review published online Wednesday in the *New England Journal of Medicine* describes evidence of what U.S. health officials now call a causal relationship between the virus and a severe form of microcephaly and intracranial calcifications.

What you should know about handwashing

Handwashing is one of the best ways to protect yourself and your family from getting sick. Handwashing is easy to do and it's one of the most effective ways to prevent the spread of many types of infection and illness in all settings—from your home and workplace to child care facilities and hospitals. Clean hands can stop germs from spreading from one person to another and throughout an entire community.

<http://www.cdc.gov/features/handwashing/...>

Do awareness days make a difference? Yes, at least one

Despite their ubiquity, it's hard to know whether awareness days actually make a difference. A new study showcases a method for teasing out the impacts of awareness days using big data and finds that at least one awareness day is having a big impact.

<https://www.sciencedaily.com/releases/20...>

'Illusion of control' leads to inappropriate medical treatment use

A new perspective paper advocates for a comprehensive approach to recognize and manage 'therapeutic illusion' to improve use of medical treatments. The therapeutic illusion -- an unjustified belief in treatment -- has been proven in previous studies in different environments. Consistently, physicians have reported overestimating the benefits of inappropriate tests and treatments.

Effect of economic crisis on birth outcome in Spain

The unprecedented post-war European economic crisis which began in 2007 and the resulting fiscal austerity policies are generally considered to have had a negative impact on public health. A new study investigates the impact of the economic crisis on birth outcomes in Spain; specifically detailing temporal changes (from 2003-2012) in underweight at birth, birth weight being an important indicator of health outcomes throughout the life course.

<https://www.sciencedaily.com/releases/20...>

Interventions requiring less individual agency should be prioritized to fight obesity

Public health interventions that require individuals to invest fewer individual personal and psychological resources are likely to be most effective and equitable; such "low-agency" approaches should therefore be central to public health action on diet and obesity, according to Jean Adams and colleagues from the Centre for Diet and Activity Research and MRC Epidemiology Unit, University of Cambridge, UK.

<https://www.sciencedaily.com/releases/20...>

Uninfected or asymptomatic? Diagnostic tests key to forecasting major epidemics

Major epidemics such as the recent Ebola outbreak or the emerging Zika epidemic may be difficult to forecast because of our inability to determine whether individuals are uninfected or infected but not showing symptoms, according to a new study from the University of Cambridge. The finding emphasises the need to develop and deploy reliable diagnostic tests to detect infected individuals whether or not they are showing symptoms, say the researchers.

<https://www.sciencedaily.com/releases/20...>

More than two-thirds of 50-70 year olds involved in a survey have never heard of overdiagnosis and less than three per cent could correctly explain what it is, according to a study in the U.K.

Treating sugar addiction like drug abuse

Millions of people globally are overweight or obese and sugar is considered a major factor. Now a world-first game-changing study suggests drugs used to treat tobacco addiction could work for sugar addiction too.

<https://www.sciencedaily.com/releases/20...>

Number of adults with diabetes reaches 422 million worldwide, with fastest increases in low and middle income countries

Since 1980, the number of adults with diabetes worldwide has quadrupled from 108 million to 422 million in 2014. The findings provide the most comprehensive estimates of worldwide diabetes trends to date and show that diabetes is fast becoming a major problem in low and middle income countries. From 1980 to 2014, the prevalence of diabetes more than doubles for men in India and China, a new study concludes. It also suggests that globally, more men than women now have the illness.

<https://www.sciencedaily.com/releases/20...>

Warming climate puts Europe at risk for seasonal outbreaks of dengue fever

Increasing temperatures will enlarge Europe's seasonal window for the potential spread of mosquito-borne viral disease, expanding the geographic areas at risk for a dengue epidemic to include much of Europe, say researchers.

<https://www.sciencedaily.com/releases/20...>

New report identifies six practices to improve health care for disadvantaged populations

A new report identifies six promising practices to improve health care for individuals with social risk factors for poor health care outcomes, such as people who are in a low socio-economic position, reside in disadvantaged neighborhoods, identify as a racial or ethnic minority, or possess limited health literacy.

<https://www.sciencedaily.com/releases/20...>

Children of older mothers do better

Children of older mothers are healthier, taller and obtain more education than the children of younger mothers. The reason is that in industrialized countries educational opportunities are increasing, and people are getting healthier by the year. In other words, it pays off to be born later.

Disruptive Innovation. Considerations for health and health care in Europe - Final opinion

European Commission's Expert Panel on effective ways of investing in health (EXPH) published an interesting report on the implications of 'disruptive innovation' for health and health care in Europe. The Expert Panel understands "disruptive innovation" in health care as a type of innovation that creates new networks and new organisational cultures involving new players, and that has the potential to improve health outcomes and the value of health care. This innovation displaces older systems and ways of doing things. Walter Ricciardi, EUPHA Past President, acted as Rapporteur of the EXPH Working Group.

11. WHO news

NEW PUBLICATIONS ISSUED BY WHO – APRIL 2016

[Global Report on Diabetes](#)

This first WHO Global report on diabetes underscores the enormous scale of the diabetes problem, and also the potential to reverse current trends. The political basis for concerted action to address diabetes is there, woven into the Sustainable Development Goals, the United Nations Political Declaration on NCDs, and the WHO NCD Global Action Plan. Where built upon, these foundations will catalyse action by all.

[Interagency List of Medical Devices for Essential Interventions for Reproductive, Maternal, Newborn and Child Health](#)

The objective of this project was to list the medical devices required to provide the essential

reproductive, maternal, newborn and child health interventions defined by existing WHO guidelines and publications, in order to improve access to these devices in low- and middle-income countries, support quality of care, and strengthen health-care system. The medical devices are allocated across the reproductive, maternal, newborn and child health continuum of care according to the level of health-care delivery.

[Malaria Microscopy Quality Assurance Manual - Version 2](#)

The Manual is designed primarily to assist managers of NMCPs and general laboratory services responsible for malaria control. The information is also applicable to nongovernmental organizations (NGOs) and funding agencies involved in improving quality management systems for malaria microscopy.

[Operational Framework for Building Climate Resilient Health Systems](#)

The objective of this framework is to provide guidance for health systems and public health programming to increase their capacity for protecting health in an unstable and changing climate. By implementing the 10 key components laid out in this framework, health organizations, authorities and programmes will be better able to anticipate, prevent, prepare for and manage climate-related health risks. Least developed countries and countries in the process of developing the health components of National Adaptation Plans (NAPs) under the UN Framework Convention on Climate Change (UNFCCC) (4) may find this document particularly useful in their efforts to design a comprehensive response to the risks presented by short-term climate variability and long-term climate change.

[Ensuring Innovation in Diagnostics for Bacterial Infection](#)

This book explores the complexities of the diagnostics market from the perspective of both supply and demand, unearthing interesting bottlenecks, some obvious, some more subtle. It calls for a multifaceted and broad policy response, and an overhaul of current practice, so that the growth of bacterial resistance can be stemmed.

[Growing up unequal: gender and socioeconomic differences in young people's health and well-being. Health Behaviour in School-aged Children \(HBSC\) study](#)

This book presents findings from the 2013/2014 survey on the demographic and social influences on the health of almost 220 000 young people in 42 countries and regions in the WHO European Region and North America.

[Israel](#)

The Health Systems in Transition (HiT) series consists of country-based reviews that provide a detailed description of a health system and of reform and policy initiatives in progress or under development in a specific country.

[Vaccine Safety Communication](#)

This guide enables effective planning and implementation of proactive communication actions to promote understanding of the importance of vaccines in preventing illness and preventable deaths, and raises awareness of vaccine risks and perceptions of risk.

[Immunization Safety Surveillance. Third edition](#)

This document is intended to assist immunization programme managers and national regulatory authorities in establishing and/or strengthening immunization safety surveillance systems.

[WHO Drug Information Vol. 30, No. 1, 2016](#)

WHO Drug Information communicates pharmaceutical information that is either developed and issued by WHO or transmitted to WHO by research and regulatory agencies throughout the World. The journal also includes regular presentations of newly proposed and recommended International Nonproprietary Names (INN) for Pharmaceuticals Substances. This volume contains the recommended INN List No.75.
