1. **EUPHA update**

Oslo, 23-25 June 2016

Theme of the 6th European Conference on Migrant and Ethnic Minority Health is ‘Equity – the Policy Practice Gap’. Plenary sessions and presentations will focus on socio-demographic and political determinants for health and the policy environment with relevance for migrants, ethnic minorities, asylum seekers, refugees, undocumented migrants. Other topics include: access and quality of health care services; disparities and inequities, social exclusion and marginalization, health system responsiveness to diversity empowerment and levers for change, etc.

2. **European Public Health Conference**

9th European Public Health Conference: All for Health, Health for All
Austria Centre Vienna, 9-12 November 2016

Registration

Registration for the 9th EPH Conference opens 1 March 2016. You can benefit from early bird registration fees until 1 September. We are expecting over 1,200 delegates. Meet your colleagues at the largest public health event in Europe and register early to benefit from the reduced rates.

Early bird registration fees for EUPHA and ÖGPH members are EUR 600. Non-members pay EUR 680, Early career professionals pay EUR 420 (all including VAT).

Preconferences can be booked online once the preconference programme is completed in May. At all times they can be added to your earlier made registration by contacting us at registration@ephconference.eu.

Abstract Submission open

Abstract submission does not have to be confined to the conference theme ‘All for Health – Health for All’. Abstracts are invited for workshops, oral presentations, pitch presentations and posters. Prizes will be awarded for the best oral, poster and early career professional’s presentation. Do not miss the opportunity to be recognised for your hard work. Abstracts and workshop proposals can be submitted here.

Preconferences, Lunch Symposiums, Exhibition

The EPH Conference offers interesting opportunities for preconferences and lunch symposiums. If you have plans for a lunch symposium, preconference or an exhibition stand at the conference, please contact office@ephconference.eu
3. EUPHA members update

News from SESPAS, the Spanish Society of Public Health and Health Administration

SESPAS has been very active in the last two months. SESPAS actively collaborates with Ecologistas en acción for the prevention on environmental risk factors. As part of this collaboration, SESPAS recently took part in the public presentation of the report “Un asunto tóxico” (a toxic issue) in Madrid and Barcelona, on the issue of endocrine disruptives and the role that lobbies like the industrial companies play in their regulation.

SESPAS participated in a newspaper and TV report about child obesity and its relationship with child poverty, and in the last meeting of “No es sano” (“It is not healthy”), a campaign aimed to protect and promote universal access to medicaments as an intrinsic part of human right to health.

SESPAS has agreed to be associate partner in the next international Preventing overdiagnosis conference, to be held in Barcelona 20 to 22nd September. Also, the society proposed the WFPHA to create a working group on the health impacts of free trade agreements.

Representatives of SESPAS met lately the Health representatives of the Regional Governments of Madrid and Extremadura, to discuss present health issues and offer SESPAS collaboration and advice in public health issues.

SESPAS has recently published calls for applications for the new director and associate director of Gaceta Sanitaria, SESPAS’ scientific journal, who have just been appointed.

Finally, the society agreed during its last assembly to establish the yearly “SESPAS award to the best public health related communication”. The prize will be given to the best communication presented during any of the member societies’ conferences.

4. European Journal of Public Health

The European Journal of Public Health is a multidisciplinary journal in the field of public health. The EJPH is published bimonthly. The journal provides a forum for discussion and debate of current international public health issues with a focus on the European region. In 2014, the impact factor of the journal is at 2.591. The 5-year impact factor is 2.512.

The EJPH is the official journal of EUPHA.

5. Call for proposals, job opportunities

The Nuffield Trust are looking for a Director of Analysis and Research See http://www.green-park-jobs.co.uk/nuffield/jd.php

Accountable to the Chief Executive, the post has the following principal responsibilities, amongst others:
1. To lead the team of researcher analysts in undertaking applied research focused on using routine data in innovative ways to inform health and social care policy and delivery in the UK.
2. To develop the strategy for analytical work for the Trust in collaboration with colleagues and partners outside the Trust, to develop specific objectives for projects and related work and manage these effectively.
3. To supervise all work within the Research Directorate and to ensure that the work is of high quality. To provide information and analytical support to a portfolio of internal/externally driven and funded
projects. To supervise and support the work of seconded and attached staff or trainees, sabbatical visitors and associates.

Person Specifications:
1. A detailed knowledge and understanding of health policy and the related information/analytical needs of key NHS bodies.
2. Demonstrated excellence in leadership and management at a senior level with a proven ability to manage multi-disciplinary researchers.
3. Proven ability to manage a significant budget and generate income from research grants and consultancy work.
4. Good facilitation, networking and project management skills, etc..

The European Medicines Agency, in order to implement the strategic priority of establishing a greater collaboration with Academia, is initiating a consultation process with the following objectives:
1. Explore opportunities to better support Academia in generating new medicines that meet regulatory standards;
2. Channel Academia's advanced knowledge into the regulatory environment;
3. Assess the degree of awareness among Academics of the existing activities and incentives provided by regulators to support medicine development;
4. Refine regulators' understanding of Academia's needs and expectations and develop a methodology for collaboration.

You are invited to participate in this process by answering a brief questionnaire that also provides space for comments and suggestions. Please click on the following link to access the questionnaire: https://www.surveymonkey.co.uk/r/EMA_Academia_consultation

Your input is very valuable and will contribute to the achievement of the above objectives. Before you start answering the questionnaire, we recommend you to read the brief background paper that provides an overview of the issues at stake.

The questionnaire is composed of 12 questions and it should take approximately 15 minutes to complete. We would welcome very much your support in disseminating the questionnaire amongst your colleagues and networks and encouraging their participation as much as possible.

The deadline for completing the on-line questionnaire is 15 April 2016.

6. Interesting news

ASHER 50th Anniversary
This year marks ASPHER’s 50th anniversary, and ASPHER will run a series of meetings and events to commemorate the special occasion. To kick off the celebration, we will hold an event on 6 - 7 April, in Brussels. This event will feature a round table of young public health professionals, followed by a meeting with EPHA on public health workforce development, and an open day event at ASPHER Brussels on April 7th exploring the role of schools of public health, to which everyone is invited. Please RSVP to office@aspher.org.

The events in Brussels will run in parallel with a seminar that Public Health Reviews will organise together with ASPHER in Salzburg, Austria from 3 - 9 April, on Migrants’ and Minorities’ Health, within the context of the prestigious OMI Salzburg Seminar Series supported by OSF/AAF. This event will feature contributions from EU, WHO, MSF and others, representing nearly 30 countries. Please email office@aspher.org for more info.

The anniversary celebration will culminate in ASPHER’s Annual Retreat to be held in Athens, 25 - 27 May. This will be a wonderful occasion to reflect on ASPHER’s incredible fifty year history, and to start planning the next half century! We hope all ASPHER members will be present.

More info will be available at http://www.aspher.org and will follow on a regular basis throughout the year, updating everyone on upcoming events.

LEPH2016: The 3rd International Conference on Law Enforcement and Public Health
As a conference supporter, EUPHA is pleased to announce the 3rd International Conference on Law Enforcement and Public Health (LEPH2016). The conference will be held at the Free University, Amsterdam, 2 - 5 October 2016. The conference is organised by the Centre for Law Enforcement and Public Health (CLEPH), Melbourne, Australia in collaboration with the Free University, Police, and Public Health Services, Amsterdam, Netherlands. The call for abstracts is open until 14 April 2016.
Main topics of the conference are directly relevant for public health professionals and include: Vulnerable communities, Substance abuse, including alcohol regulation and harm reduction, Infectious diseases, including risks for drug users and sex workers, Mental health, including special challenges for policing, Violence prevention from a public health perspective, Trauma, especially road trauma and risks to practitioners. If you wish to make a presentation at LEPH2016, submit an abstract by 14 April.

More information: www.leph2016.com

INHERIT research project kicks off
INHERIT - Intersectoral Health and Environment Research for Innovation – a new 18-partner, 4-year Horizon 2020 research project has started to examine the health and environmental implications of our living, moving and consuming patterns. The project brings together experts from the health, environment and other sectors, including technology, to investigate how to ensure environmental sustainability and improve health equity and well-being. The goal: to see how we can modify our lifestyles to simultaneously protect the environment and our health.

Our current lifestyles, characterized by ‘take-make-consume-dispose’ models of economic growth, are damaging the environment and our health. The proportion of adults in EU Member States that are considered to be overweight or obese range between 37.0 % (Italy) and 56.7 % (UK) for women and between 51.0 % (France) and 69.3 % (Malta) for men. A recent Royal College of Physicians’ report sets out that around 40,000 of deaths in the country per year are attributable to exposure to outdoor air pollution, which has also been related to cancer, asthma, stroke and heart disease, diabetes, obesity, and changes linked to dementia.

Call for survey participation on Social Policy Reforms in Europe
In the context of the project Social Inclusion Monitor Europe Bertelmann Stiftung are looking for support from partners with expertise in the field of public health in Europe. This survey provides a platform where you can share your expertise for a specific EU country and learn about ongoing social policy reforms in other EU countries. The idea is to better understand which social policy measures work and to be able to make informed policy decisions in the future.

WFPHA
The General Assembly will take place on Sunday 22 May 22 at the John Knox Centre, Geneva. Unfortunately, WFPHA cannot support travel and associated costs. Please inform WFPHA by 15 April if you plan to attend the GA.

Training on virtual patients for dietitians in Europe
Project of the St. Poelten University of Applied Sciences develops innovative learning concept for dietetics in Europe
What people eat has a significant impact on diseases such as cardiovascular disease, diabetes and cancer. With nutritional therapy, dietitians make a valuable contribution to the preservation of health. However, the approaches to diagnosis and therapy in dietetics differ from country to country. The EU project IMPECD (Improvement of Education and Competences in Dietetics) is therefore developing uniform standards in the form of a freely accessible online course (massive open online course - MOOC). Training will thereby be done on virtual patients. This innovative learning opportunity promotes quality in training of dietetic students and the dietetic profession as well as international exchange.

Zika virus sparks ‘public health emergency’
The World Health Organization declared a “public health emergency of international concern” over the Zika virus and the health problems that doctors fear it is causing. The agency said the emergency is warranted because of how fast the mosquito-borne virus is spreading and its suspected link to an alarming spike in babies born with abnormally small heads — a condition called microcephaly — in Brazil and French Polynesia.

Scientists Discover A Second Bacterium That Causes Lyme Disease
Until very recently it was thought that just one bacterium was to blame for causing Lyme disease in humans. But it turns out that a second, related bug can cause it too.
In 2013, during routine testing of bacterial DNA floating around in the blood samples of people suspected of having Lyme disease, researchers at the Mayo Clinic in Rochester, Minn., realized they were looking at something different.

Top academics warn that without a proactive approach to insecticide resistance, gains made in malaria prevention could be lost
LSTM’s Director Professor Janet Hemingway, along with 14 other eminent researchers in the field of vector biology, have put together an editorial outlining the need for a more urgent and proactive approach to insecticide resistance, if the gains made in malaria prevention in the 21st century are not to be lost. In an editorial in the journal The Lancet, Professor Hemingway and her colleagues, look at how the last 15 years of control measures and treatment have led to massive reductions in disease prevalence in Africa since 2000. However from the very beginning, the article warns of the looming public health catastrophe should the burden of resistance to insecticide continue to express.

Chewing sugar free gum could save millions a year
The NHS in England could save £8.2 million a year on dental treatments -- the equivalent to 364,000 dental check-ups -- if all 12-year-olds across the UK chewed sugar free gum after eating or drinking, thanks to the role it plays in helping to prevent tooth decay.

There may be an exercise sweet spot for losing weight
Working out has numerous health benefits, but if you are trying to lose weight, exercise alone may not be enough: The body may adapt to higher levels of physical activity, so you may not burn more calories even if you exercise a lot, a new study suggests. The researchers found that the people in the study who engaged in moderate levels of physical activity burned about 200 more calories per day, on average, than those who had the lowest levels of physical activity. However, the people who were the most physically active burned the same number of calories, on average, as those who were moderately active, the researchers found.

Violence and mental health: its manifold faces
Jutta Lindert and Itzhak Levav (eds)
Violence is one of the most important challenges, not only for public health systems, but also for public mental health. Violence can have immediate as well as long-term and even transgenerational effects on the mental health of its victims. This book provides a comprehensive and wide-ranging assessment of the mental health legacy left by violence. It addresses the issues as they affect states, communities and families, in other words at macro-, meso- and microlevels, beginning by describing the impact of violence on neurobiology and mental health, as well as the spectrum of syndromes and disorders associated with different forms of violence.

11. WHO news

Regions for Health Network
The Regions for Health Network 22nd annual meeting report is now online. From 14 to 15 October 2015, the 22nd annual meeting of the Regions for Health Network (RHN) was held in Milan, Italy. The main theme was ‘Improving health and equity across regions and sectors’. This year, it was organised as a preconference of the 8th European Public Health Conference, including capacity-building sessions and the RHN business meeting. Capacity-building sessions addressed important scientific evidence and practical efforts to improve health and equity: joining forces – citizens and regions for better health; starting people on a healthy life course – evidence, policy and advocacy; and tackling health inequities at subnational level – grounding actions on data. These were put in the context of the WHO European health policy framework, Health 2020, and efforts to translate it into practice at regional level. The RHN business meeting provided its Steering Group and members with an opportunity to describe and discuss their main activities during the previous and coming year, including the revision of the terms of reference, a programme of publications and new ways of extending RHN’s effectiveness
Films showing smoking scenes should be rated to protect children from tobacco addiction
1 February 2016 -- WHO is calling on governments to rate movies that portray tobacco use in a bid to prevent children and adolescents from starting to smoke cigarettes and use other forms of tobacco.

Latest Ebola outbreak over in Liberia: West Africa is at zero, but new flare-ups are likely to occur
14 January 2016 -- Today, WHO declares the end of the most recent outbreak of Ebola virus disease in Liberia and says all known chains of transmission have been stopped in West Africa. But the Organization says the job is not over, more flare-ups are expected and that strong surveillance and response systems will be critical in the months to come.

End of Ebola transmission in Guinea
29 December 2015 -- Today WHO declares the end of Ebola virus transmission in the Republic of Guinea. Forty-two days have passed since the last person confirmed to have Ebola virus disease tested negative for the second time. Guinea now enters a 90-day period of heightened surveillance to ensure that any new cases are identified quickly before they can spread to other people.
