1. EUPHA update

**New E-collection on mental health and mental disorder**
We are pleased to announce the publication of a new E-collection. The topic of this July collection is mental health and mental disorder and is introduced by an editorial of Prof. Jutta Lindert, president of the EUPHA section on Public mental health. E-collections offer you the opportunity to access high profile articles published in the European Journal of Public Health on a specific topic. The E-collections are freely accessible for a 3-month period. [https://academic.oup.com/eurpub/pages/me...](https://academic.oup.com/eurpub/pages/me...)

**Sign the petition: EU do more for health**
Health is absolutely and unequivocally a core business of the EU.
EUPHA, European Public Health Alliance (EPHA), the European Patients’ Forum (EPF) and a coalition of organisations have teamed up to express their concerns in a letter to European Commission President, Jean Claude Juncker. We call on the European Commission to step up coordinated EU action to tackle cross-border health challenges. Read more and sign the petition here: [https://epha.org/eu-do-more-for-health-campaign/](https://epha.org/eu-do-more-for-health-campaign/)

**Prof Walter Ricciardi knighted**
Prof. Walter Ricciardi, past president of EUPHA, has been knighted by the President of Italy for his contribution to public health. Prof. Ricciardi not only put public health on the Italian agenda, he has also been the motor behind the EUPHA strategy 2014-2020. EUPHA congratulates Prof Ricciardi with this great honour.

**Leadership in Healthcare - Salzburg seminar**
EUPHA is proud to be a partner of this important Salzburg seminar: 2017 Salzburg UCSC/EUPHA Seminar in LEADERSHIP IN HEALTHCare. Sunday 10 September – Saturday 16 September 2017 [http://www.aaf-online.org/tl_files/exter...](http://www.aaf-online.org/tl_files/exter...)

**MERH 2018: call for abstracts now open!**
EUPHA is very proud to be one of the supporting organisations for the first World Congress on Migration, Ethnicity, Race and Health, organised from 17-19 May 2018 in Edinburgh. **The call for abstracts is now open!**
The deadline for submissions is October 6. More information can be found on the MERH website: [http://www.merhcongress.com/](http://www.merhcongress.com/)

**EUPHA represented at the Design and Health Conference in Vienna**
The president of our EUPHA section on Public mental health - Prof. Jutta Lindert - attended the 12th World Congress on Design and Health in Vienna, 12-16 July. Design and architecture are important to public health and EUPHA and the EPH Conferences have increased its activities on this topic. During the Milan 2015 conference, a pre conference on architecture and health was started. This has been continued and for Stockholm 2017, a full day preconference will be organised on Wednesday 1 November on Mental health and architecture, co-organised by EUPHA (MEN) (URB) and (ENV) and Politecnico Milano. For more information on this pre conference: [https://ephconference.eu/2017-preconference-programme-356](https://ephconference.eu/2017-preconference-programme-356)

**EUPHA present at the European Parliament debate on Antimicrobial resistance**
Prof. Carlo Signorelli, member of the EUPHA Executive Council, represented EUPHA at this important meeting on 27 June, initiated by two Members of the European Parliament, MEPs Nicola Caputo (SandD) and José Inácio Faria (EPP).

**New individual members from the Russian Foundation and Kosovo**
We are happy to announce that we have a contact person - individual member from the Russian Federation: Dr Diana Denisova, Research Institute of Internal and Preventive medicine in Novosibirsk.

We also are happy to announce that we have a contact person- individual member from Kosovo: Prof Naim Jerliu, National Institute of Public Health of Kosovo, Prishtina.

This expands our network to 45 countries!
GLEPHA becomes partner of EUPHA
We are very happy to announce that EUPHA has set up a mutual partnership with the newly established GLEPHA - Global Law Enforcement and Public Health Association. After several years of collaboration with the Law Enforcement and public health conference, we are happy that GLEPHA was established and look forward to continued and strengthened collaboration.
http://www.cleph.com.au

ECDC Summer School 2017: Workshop given on Economic Analyses of Public Health Interventions
The president of our EUPHA section on Public health economics - Dr Tek-Ang Lim - organised a one-day interactive workshop during the ECDC summer school (29 May-2 June) on Economic Analyses of Public Health Interventions.

2. European Public Health Conference

STOCKHOLM 2017: EVERYBODY WILL BE THERE

Parallel programme
The full parallel programme divided over 16 tracks of 10 sessions each is available online. Presenters can check the track, session and time of their presentation in the updated online programme.

Pre-conferences
Check the pre-conference webpage for regular updates.

Registration
You can benefit from early bird registration fees until 1 September.

3. EUPHA members update

3rd V4 Conference on Public Health
The Czech Society of Social Medicine and Health Care Management invite to the 3rd V4 Conference on Public Health to be held in Prague, on 19-20 October 2017.
Four years after the success of the 1st V4 Conference on Public Health that was held in Kosice, Slovakia, in 2013, and two years after 2nd V4 Conference on Public Health in Zabrze, Poland, in 2015, we kindly encourage international scholars, students, physicians and all public health specialists, practitioners and leaders to join us in Prague, Czech Republic. We believe you will use this opportunity to join the international forum to share and discuss ideas and experiences, present and publish research results, as well as simply arrange and develop your personal cooperation networks. We expect 150 international participants, especially from the so-called V4 countries (Czech Republic, Slovakia, Hungary, and Poland). Although the conference will primarily focus on the Visegrad Group Member States, colleagues from other countries are also kindly welcome!

The conference is held under the auspices of Radek Lacko, the City of Prague councilor for health and housing.
The conference is organized by collaborating partners: the Czech Society of Social Medicine and Health Care Management of the Czech Medical Association of J. E. Purkyně, the Institute for Postgraduate Medical Education in Prague (IPVZ), the Slovak Public Health Association (SAVEZ), the Polish Society of Public Health, and the Hungarian Association of Public Health Training and Research Institutions (HAPHI). http://conference2017.ipvz.cz/
The Société Française de Santé Publique organizes a public health conference in Amiens, from 4 to 6 October
This conference is co-organized with the Association des épidémiologistes de langue française – ADELF with a main theme : “Science and health practitioners: Articulate knowledge and practices”. The full programme and additional information about the conference is available on the website: http://urlz.fr/5CCC.

4. European Journal of Public Health

The European Journal of Public Health is a multidisciplinary journal in the field of public health.
The EJPH is published bimonthly. The journal provides a forum for discussion and debate of current international public health issues with a focus on the European region. In 2016, the impact factor of the journal is at 2.751. The 5-year impact factor is 2.512.
The EJPH is the official journal of EUPHA.

5. Call for proposals, job opportunities

Free University of Brussels: Scientific assistant (F/M/X)For a challenging doctoral research project, Interface Demography (VUB) and the Stichting Kankerregister are seeking a Scientific assistant (F/M/X)
As a scientific assistant you will work on a FWO-project into differences in cancer according to migrant origin. European societies are ageing and an ever-increasing group of older people have a migrant background. Belgium leads in this development, as large-scale immigration took place relatively early in its history. An older population is certainly good news, but raises a number of challenges, as older people often have weaker health and are more vulnerable to some cancers and other diseases. While cancer risks in the older host population have already been adequately mapped, much less is known about the cancer risks of immigrants. Large-scale studies into cancer incidence and mortality that compare the host population to those of migrant origin are relatively rare in Europe. However, it is very important to study these differences because our societies are ageing and because the factors that cause cancer have not yet been fully mapped. The project on which you will work will do this for Belgium. As first generation immigrants exchange their country of origin for another (host) country and thus also for another healthcare environment, they can be considered an ‘experimental group’. Consequently, the study of cancer and its mechanisms in the population with a migrant background versus the host population can provide an insight into the mechanisms of that cancer: e.g. with respect to the importance of environmental versus genetic factors in the development of certain cancers. These findings will not only increase our knowledge of cancer and its causes but also have the potential of steering future policy aimed at improving the health of all people in an ageing society.

You will be responsible for the following duties:
Performing the proposed research project:
- Thorough literature study of the subject
- Methodological analysis and statistical analysis
- Clear reporting, accurate and concise synthesis of methods, analyses and results
- Publishing articles in scientific peer-reviewed journals

Job profile
- You have a master’s degree in (Bio)medical Sciences, Paramedical Sciences, Public Health, Applied Science, Social Sciences or Bio-Engineering Sciences with prior knowledge of (bio-)statistics.
- You are a ‘passionate researcher’ with expertise/interest in quantitative research.
- You have the necessary software skills for managing databases and data analyses (including knowledge of SAS, SPSS, Stata, etc.)
- You have experience/interest in epidemiological research and a passion for the ‘social inequality’ theme.
- You are prepared to write a doctoral thesis based on the research.
- You have good written and oral communication skills in English and preferably also in Dutch.
- You are able to work in a collegial manner within a research team.

We offer:
- A full-time appointment as scientific employee for 4 years within the possibility of obtaining a doctorate.
- Based on your experience and academic merits, you will receive a salary on one of the pay scales established by the government. Hospitalisation insurance and the free use of public transport for commuting are included as standard. If you would prefer to cycle to work, then there is also some remuneration for that.
- A motivating post in a young and dynamic team with space for contact and initiative.
- A strong scientific guidance within a reputed, dynamic and multidisciplinary research team.
- Diverse opportunities for further training in connection with this position both at the Stichting Kankerregister and the VUB.
- Interesting national and international research contacts.

Practically
As a doctoral student you will be affiliated to the Vrije Universiteit Brussel and your promotor is Professor Dr Hadewijch Vandenheede. Given the subject of the proposed research project, you will work under the supervision of Professor Vandenheede and the researchers at the Kankerregister. Physically you will primarily work at the Kankerregister in Brussels (estimate 60% at the Kankerregister in Brussels, 40% at the Interface Demography Department of the VUB). The anticipated start date for the project is 1 October 2017. The duration / term of the contract is 4 years.

The deadline for applications is 15 August 2017. Applications can be sent electronically by sending your covering letter and CV to hadewijch.vandenheede@vub.ac.be.

Warwick Evidence is seeking to appoint up to two Assistant Professors
Warwick Evidence is seeking to appoint up to two Assistant Professors in Health Technology Assessment and Epidemiology/Implementation Science to contribute to the expanding programme of Health Technology Assessment in Warwick Medical School (WMS). You will jointly lead the clinical effectiveness reviewing and evidence synthesis of HTA projects for Warwick Evidence during the production of multiple technology appraisals (MTAs) and single technology appraisals (STAs) for the National Institute for Health and Care Excellence (NICE) appraisal process and other research projects. You will work with a multidisciplinary team of information specialists, researchers, health economists, modellers and other clinical effectiveness systematic reviewers in appraising evidence on the clinical and cost effectiveness of health technologies, including drugs, devices and diagnostics. Work undertaken will directly inform national health policy giving the post-holder experience of the application of evidence synthesis in clinical decision making, decision modelling and epidemiology. Informal enquiries are welcome and should be directed to: Prof Aileen Clarke, Email: Aileen.Clarke@warwick.ac.uk or Dr Paul Sutcliffe, Email: p.a.sutcliffe@warwick.ac.uk. More details available at: http://www.jobs.ac.uk/job/BCN701/assistant-professor-in-health-technology-assessment-and-epidemiology-implementation-science-79136-077/

The School of Public Health (Université Libre de Bruxelles) has a vacancy for a full-time academic position in Biostatistics
(http://wwwdev.ulb.ac.be/greffe/files/5774.pdf)
Job description:
The position is characterized by a load which is divided into two parts: 50% teaching and 50% research. Beyond this sharing, the candidate will also participate in various administrative / logistics responsibilities at the school. It will also work to strengthen the place of the School of Public Health in the national and international expertise in the specific areas “quantitative methods applied to epidemiology” in general and “biostatistics” in particular.

It will also ensure and maintain a productive high-level research and promote partnership with other research centers of the School of Public Health, the Faculty of the “Pôle Santé” but also with other national and international institutions.

Main Research Field : Medical sciences
Sub Research Field : Biostatistics
Required educational level: Master level in Medical Sciences (PhD in Medical Sciences)
Required Languages: Français : native, English : excellent

For more information, please contact Prof. Alain LEVEQUE (phone: 32 2 555.40.44 - e-mail: aleveque@ulb.ac.be).

Applications must be sent by e-mail to the rectorate of the Université Libre de Bruxelles (recteur@ulb.ac.be) and to the faculty deanship (presidence.esp@ulb.ac.be).

They must include the following:
- an application letter
- a Curriculum vitae including a list of publications (a template can be downloaded at http://www.ulb.ac.be/tools/CV-type.rtf)
- any relevant documents showing 4 years of research experience
- a 7,000-character report (4 pages) presenting the applicant’s research activities and a research project, including how these will integrate into ULB's research teams
- a teaching dossier including a 7,000-character report (4 pages) on the applicant's previous teaching activities and a teaching project for the first five years in this position; these must be relevant to the faculty and to the teaching profiles for the programmes to which the applicant is to contribute. a note on the applicant's international achievements and projects (no more than 4 pages)
- the names and e-mail addresses of five references (with equal gender representation) who may be contacted by those in charge of evaluating applications. These references should not have conflicts of interest.

By sending in their application, applicants acknowledge they have read and understood the additional information and the regulations relevant to research staff, available at the following address http://www.ulb.ac.be/emploi/academique.html.

Reference : 2017/A042
Application deadline : 08/01/2018
Start date: 01/10/2018

Type of contract : temporary
Tours per week : 38
Required Research Experiences : medical sciences (Biostatistics) : (4 years)
Researcher profile : Early stage researcher (0-4 years)

6. Interesting news

Income directly affects children’s outcomes, says new report
Poorer children have worse cognitive, social-behavioural and health outcomes because they are poor, and not just because poverty is correlated with other household and parental characteristics, according to a new report from the London School of Economics and Political Science (LSE).
https://www.sciencedaily.com/releases/20...

Artificial Sweeteners Are Linked to Weight Gain--Not Weight Loss
Artificial sweeteners might seem like a low- or no-calorie way to enjoy sweet food and not gain weight. But a new study links them to the opposite. In the report, published in the Canadian Medical Association Journal, researchers analyzed 37 studies on artificial sweeteners to see if they were successful for weight management. The studies followed more than 400,000 people for about 10 years. Seven of the studies were randomized controlled trials, a type considered to be the gold standard in scientific research. Artificial sweeteners did not appear to help people lose weight. Instead, observational studies that looked at consumption over time suggested that people who regularly
consumed them—by drinking one or more artificially-sweetened beverage a day—had a higher risk for health issues like weight gain, obesity, diabetes and heart disease. 

http://time.com/4859012/artificial-sweet...

New method helps fighting future pandemics
By developing a new technique for labeling the gene segments of influenza viruses, researchers now know more about how influenza viruses enter the cell and establish cell co-infections – a major contributing factor to potential pandemic development. 
https://www.sciencedaily.com/releases/20...

British smokers down by 1.9 million since smoking ban
Ten years after cigarettes were banished from all UK pubs, clubs, bars and restaurants, new figures from Cancer Research UK today (Saturday) reveal there are 1.9 million fewer smokers in Britain compared to when the smoking ban was introduced in 2007, with smoking rates now the lowest ever recorded. 
https://www.sciencedaily.com/releases/20...

Long working days can cause heart problems, study says
It’s been established that too many hours in the office can increase the risk of a stroke. Now it seems that clocking up more than 55 hours a week means a 40% higher chance of developing an irregular heartbeat, known as atrial fibrillation (AF), when compared to those with a better work-life balance. 
https://www.theguardian.com/science/2017...

'Activity inequality' could be one of the biggest factors in obesity
A global study by Stanford University researchers involving hundreds of thousands of smartphone users found a new public health risk for obesity: “activity inequality.” 
http://www.businessinsider.com/activity...

Measles continues to spread and take lives in Europe
Ongoing measles outbreaks in the WHO European Region have caused 35 deaths in the past 12 months. The most recent fatality was a 6-year-old boy in Italy, where over 3,300 measles cases and 2 deaths have occurred since June 2016. Several other countries have also reported outbreaks; according to national public health authorities, these have caused 31 deaths in Romania, 1 death in Germany and another in Portugal. “Every death or disability caused by this vaccine-preventable disease is an unacceptable tragedy,” says Zsuzsanna Jakab, PhD, WHO Regional Director for Europe. “We are very concerned that although a safe, effective and affordable vaccine is available, measles remains a leading cause of death among children worldwide, and unfortunately Europe is not spared. Working closely with health authorities in all European affected countries is our priority to control the outbreaks and maintain high vaccination coverage for all sections of the population.”
http://www.euro.who.int/en/media-centre/...

The return of the plague
Bubonic plague brought terror to medieval Europe. Over a third of its population perished from the “Black Death” in the 14th century, hastening the end of the feudal system. As a bacterial disease, the plague these days is generally treatable with modern antibiotics. Nonetheless, it persists beyond the grim chapters of history.

A changing society: 100 is the new 80
When it comes to aging successfully and remaining in good health, are centenarians the perfect role models? Researchers have been studying illness trajectories in centenarians during the final years of their lives. According to their findings, people who died aged 100 or older suffered fewer diseases than those who died aged 90 to 99, or 80 to 89. 
https://www.sciencedaily.com/releases/20...

Global disease: Nearly 13 million infants were not vaccinated in 2016
New estimates from the World Health Organization and UNICEF have found that 12.9 million infants, or nearly 1 in 10, around the world didn’t receive any vaccinations in 2016. Consequently, these infants missed the first dose of the combined vaccine against diphtheria-tetanus-pertussis (DTP3),
which are potentially deadly diseases. The WHO and UNICEF findings, released online Monday, also found that about 6.6 million infants who did receive their first dose of DTP-containing vaccine didn’t complete the full, three-dose immunization series during that time. Diphtheria is a bacterial infection that can cause infection of the nasopharynx, which may lead to breathing difficulties and death. Tetanus germs are likely to grow in deep puncture wounds caused by dirty nails, knives, tools, wood splinters and animal bites. And pertussis, more commonly known as whooping cough, is a disease of the respiratory tract caused by bacteria that live in the mouth, nose and throat.

Worldwide Prison Health Research & Engagement Network (www.WEPHREN.org)
Public Health England, in partnership with the WHO Regional Office for Europe and the University of Oxford, has launched an international web platform on The Global Health Network called the Worldwide Prison Health Research and Engagement Network (www.WEPHREN.org). There are more than 10 million people imprisoned worldwide; people in prison experience a higher burden of chronic illness, mental health and substance misuse problems than the general population. They often come from already marginalised and underserved groups in the wider community which makes prison an important public health opportunity for tackling health problems in a way that can deliver benefits to the individual as well as supporting reintegration into community life and future health. There is a lack of a robust evidence base to support healthcare commissioning and interventions in prison; WEPHREN will provide a forum for all stakeholders interested in reducing health inequalities through prison health to share good practice and build capacity across the globe in both the evidence base and public health practice.

WEPHREN is supported by the WHO Health in Prisons Programme Steering Group which includes various international organisations.

For more information and to join WEPHREN, please register at www.wephren.org

7. Upcoming courses and conferences

Going International is the first source for finding courses, seminars, congresses and other events in the fields of medicine & health. Going International is Europe’s biggest service provider and information platform and serves as an interface between organisers and participants of events. Going International is an official partner of EUPHA.

New Eurohealth on Measuring efficiency in health care

Eurohealth (now incorporating Euro Observer) is a quarterly publication that provides a forum for researchers, policy-makers and experts to express their views on health policy issues and so contribute to a constructive debate on health policy in Europe. The aim of Eurohealth is to bridge the gap between the scientific community and the policy-making community by providing an opportunity for the publication of evidence-based articles, debates, and discussions on contemporary health system and health policy issues.

Eurohealth Observer - Identify the causes of inefficiencies in health systems, The challenges of using cross-national comparisons of efficiency to inform health policy; Eurohealth International – Big data for public health: Does the data promise a better quality of life?, The SELFIE Framework for Integrated Care for Multi-Morbidity, Time to focus on benefits beyond the health sector: the example of health literacy, New draft EU Directive submits the regulation of health professions to a proportionality test; Eurohealth Systems and Policies - New measures to increase the health budget in Romania and Eurohealth Monitor.

9. European Commission news

Commission launches public consultation on Health and Care in the Digital Single Market
The consultation will collect information on three main pillars:
1. Citizens’ secure access to their health data and the possibility to share it across borders, clarifying citizens’ rights and enhancing interoperability of electronic health records in Europe;
2. Connecting and sharing data and expertise to advance research, personalise health and care, and better anticipate epidemics;
3. Using digital services to promote citizen empowerment and integrated person-centred care.
Citizens, patient organisations, health and care professionals, public authorities, researchers, industries, investors, insurers and users of digital health tools are all invited to share their views via EU Survey until 12 October 2017.

Light Emitting Diodes (LEDs): public consultation on the SCHEER Preliminary Opinion on potential risks to human health launched
The European Commission and its Scientific Committee on Health, Environmental and Emerging Risks (SCHEER) today publish the preliminary Opinion on the potential risks to human health of Light Emitting Diodes (LEDs).
Interested parties are invited to submit comments on the scientific evidence online before 17 September 2017.

11. WHO news

New WHO guidelines on ethical issues in public health surveillance
World Health Organization
Published online: 2017
The WHO Guidelines on Ethical Issues in Public Health Surveillance is the first international framework of its kind, it fills an important gap. The goal of the guideline development project was to help policymakers and practitioners navigate the ethical issues presented by public health surveillance. This document outlines 17 ethical guidelines that can assist everyone involved in public health surveillance, including officials in government agencies, health workers, NGOs and the private sector.
Surveillance, when conducted ethically, is the foundation for programs to promote human well-being at the population level. It can contribute to reducing inequalities: pockets of suffering that are unfair, unjust and preventable cannot be addressed if they are not first made visible. But surveillance is not without risks for participants and sometimes poses ethical dilemmas. Issues about privacy, autonomy, equity, and the common good need to be considered and balanced, and knowing how to do so can be challenging in practice.

Regional progress towards achieving the health-related Millennium Development Goals
Pan American Health Organization
Published online: 20 June 2017
The Pan American Health Organization announces the publication of the report, “Regional progress towards achieving the health-related Millennium Development Goals”. During this 15-year period, health maintained an explicit and privileged role within the universal framework for development, inspiring a myriad of initiatives that shaped and invigorated the global health agenda. Throughout the Region of the Americas, many countries reached or surpassed goals to reduce child mortality, control infectious diseases, reduce poverty and increase access to improved water, sanitation, education and infrastructure. This report presents a summary of Regional achievements toward the health-related
Intended to supplement evaluations conducted by Member States at the national, sub-national, and municipal levels, this report provides a baseline of reliable evidence to support effective decision-making for the 2030 Agenda for Sustainable Development. It also draws upon valuable experience that was gained in pursuit of the MDGs, describing challenges, lessons learned and suggested initiatives that should be considered as we continue to move forward into a new era of development.

**WHO Regional Health Network July update**

Communicating about noncommunicable diseases and their risk factors: workshop in Malta for journalists from countries participating in the WHO Small Countries Initiative 03-07-2017

The Fourth High-level Meeting of the Small Countries Initiative took place in St Julian’s, Malta, on 26–27 June 2017. The focus of the workshop was “taking action on noncommunicable diseases (NCDs)”. The particular aim was to consider how communication officers and journalists could best convey information about NCDs and the relationship between the risk factors for NCDs (harmful use of alcohol, tobacco use, unhealthy diet and physical inactivity) and the social determinants of health.

**Public Health Wales publishes an International Health Strategy 2017–2027 30-06-2017**

Public Health Wales has developed and published an International Health Strategy 2017–2027 with the vision of building a globally responsible, world leading and inspiring public health agency, achieving a healthier, happier and fairer Wales. The mission of the Strategy is to maximize the impact of international and global health engagement and partnership in order to protect, improve and promote health and well-being and reduce health inequalities within and beyond Welsh borders.

**Regions for Health Network (RHN) and Healthy Cities Network together in Ostrava to build environmental and social resilience 22-06-2017**

Between 13 and 15 June 2017 an RHN delegation participated in the Sixth Ministerial Conference on Environment and Health, held in Ostrava, Czech Republic. During the conference a side event was organized, whereby some cities and regions presented the joint statement of the WHO Healthy Cities Network and the RHN.

**The RHN presented its activities during the Festival of Economics in Trento (Italy) 09-06-2017 On 1–4 June 2017**

Trento (Italy) hosted the Festival of Economics, which this year focused mainly on health inequalities. The WHO European Office for Investment for Health and Development, based in Venice was invited on 2 June to present the activities of the Regions for Health Network (RHN), whose mission is to tackle health inequalities.
