

Project based databases -providing sustainability through the ESFRI roadmap with InfAct

EPH Pre-Conference 28/11/18

Name: Petronille Bogaert and Herman Van Oyen
Institution: Sciensano, Belgium
Contact: infact.coordination@sciensano.be

This project is funded by the Health Programme of the European Union

EU projects in health information

Mapping exercise

- living networks of experts
- from several countries that perform
- comparative research across Europe
- in a specific health research area or health information domain
→ field of population health and/or health system performance.

➔ Need for EU health information infrastructure.

Goals of InfAct

InfAct's goals are to strengthen national and EU health information systems by:

1. Establishing a sustainable research **infrastructure** which will support population health and health system performance assessment.

2. Strengthening European health information and knowledge bases and health information research **capacities** to reduce health information inequalities,

3. Supporting health information **interoperability** and **innovative** health information tools and data sources.

InfAct partners

40 institutions in 28 countries:

Austria, Bosnia Herzegovina,
Belgium, Croatia, Cyprus, Czech
Republic, Estonia, Finland, France,
Germany, Greece, Ireland, Italy,
Latvia, Lithuania, Luxembourg,
Malta, Moldova, Netherlands,
Norway, Poland, Portugal, Romania,
Serbia, Slovenia, Spain, Sweden,
United Kingdom

WP	Title	Description
1-3	Coordination, dissemination and evaluation	Management of the action, dissemination of its activities and evaluation of the action
4	Integration in National Policies and Sustainability	<p>Ensure the outcomes of InfAct are integrated (inter)nationally</p> <p>Organisation of 3 Assembly of Members with representatives from Ministries of Health and Research → Memorandum of Understanding</p>
5	Status of health information systems in MS and regions	Assessment of health information systems through peer-review. Cataloguing of networks and projects. Prioritization of health information
6	Strengthen EU countries health information capacity	Developing a capacity strengthening baseline programme at EU level to support critical areas of health information use and management → Flagship training programme
7	Proof of concept of sustainable structure on health information	<p>Developing a proof of concept of a sustainable organisational structure - working towards ERIC by:</p> <ul style="list-style-type: none"> • Application for ESFRI roadmap • Connection research networks • Development business case and roadmap • Creation of web-based platform

Research Infrastructure for Health Information

One stop shop for
for population health
and health systems

Bringing together public health and research institutes, existing research networks and experts in health information.
Supporting the development of new collaboration and networks both within and between European countries.

Services Health Information Research Infrastructure

1

One-stop-shop for EU health information research

Find the data, expert, network, guidelines or tool you are looking for

Innovative research in health information

Be the first to know and use the latest developments and methodologies

2

3

Capacity building in health information

Get expert support and training on collection, analysis, reporting and transformation

Decision-making based on evidence based research

Know your (health) policies are based on proper evidence

4

Added value

FRAGMENTATION
