

JTN2022 - JOIN THE NETWORK MEETING EUPHA CHILD AND ADOLESCENT PUBLIC HEALTH SECTION

The JTN meeting took place online on Thursday, November 12th

Organized by the EUPHA CAPH Steering committee:

Prof Sonia Saxena (president, chair), Dr Julia Dratva (vice president, co-chair), Dr Karin Boode, Dr Lourdes Cantarero-Arévalo, , Dr Danielle Jansen

Around 40 people joined in. After introducing the steering committee, president Sonia Saxena was looking back on all the things the committee has achieved in 2022. Vice president Julia Dratva showed the attendees our plans for 2023 and we discussed what we would like to work on together in 2023.

These are the topics mentioned:

1. Health promotion (literacy) : identifying the youth's (and parents) needs and what they need to know/life skills
2. Digital Health Data
3. Health Systems: learning objectives at school/the curriculum does not include mental/fysical health
4. Chronical diseases
5. Health inequality

As the interest of young people is not reflected in (health) policy, we should work on integrated health topics and addressing stakeholders on the right level.

One of the ideas was to organize a participatory workshop on engagement of parents and children/adolescents. Can they act as an advisory group? Can we share materials and best practices on this subject?

We were happy that everyone left their names and email addresses, so we can expand our CAPH-network. We will organize several online meetings coming year to exchange knowledge and work together on the above mentioned topics.

Sonia Saxena closed the meeting and thanked everybody for their engaged participation

Minutes by Karin Boode
