

Annual report 2023

Goals for 2023

Participation in health week

Workshop organisation, submission, acceptance for EPHC.

Plans for a section conference in 2024

Collaboration with section members

The section this year successfully collaborated with several other sections to successfully set up workshops for the November Dublin conference. Collaboration included with the Mental Health; EUPHAnxt; EUPHA Public Health Epidemiology; EUPHA Public Health Economics; EUPHA Health Service Research; EUPHA Public Health Genomics

Activities at the EPH Conference

A skills building Seminar was co-organised with Sciensano and EUPHnxt and accepted for Dublin. This was entitled Translational research to policy through effective policy briefs.

A workshop which was accepted is entitled Mental Health in Old Age with the Mental health section.

Another accepted workshop in collaboration with several sections is entitled Cancer Epidemiology and Prevention: which opportunities from the EU Cancer Mission?

Another accepted workshop entitled Innovations for chronic diseases management: complementing usual care with digital therapeutics in collaboration with the digital health communications section

Another workshop entitled . Obesity: the greatest burden of the 21st Century and the post-pandemic. (with Nutrition and Environmental health sections)

Also, another accepted workshop entitled Long COVID: A myth or a reality? (with Infectious diseases section)

The selected Chairs for this year's The Ferenc Bojan prize for the best young research paper are both members of this section: Julian Mamo and Iveta Nagyova

Other activities

International participation in events on behalf of EUPHA

Collaboration with the European association of cancer leagues to organise a webinar for this year's public health week entitled Exploring the Link between Body weight and Cancer.

World congress on public health – Rome, Italy, May 2023
