## Health Technology Assessment

The EUPHA Health technology assessment section aims to optimise resource allocation and evidence-informed decision-making through the **assessment of the broader impact of health technologies**. In particular, the Section offers a structured platform to collect and share expertise from different fields in order to apply HTA to technologies used in public health. Goals extend from research to global advocacy, in support of the Sustainable Development Goal 3.

EUPHA Sections bring together researchers, policymakers and practitioners working in the same field for knowledge sharing and capacity building. By joining this Section, you can exchange knowledge with your peers in the field of health technology assessment. You don't need to be a EUPHA Member to join a Section.

We currently have 1715 section members.

It would be great to add you to those members!

# GOAL FOR 2024

- Increase the number of EUPHA-HTA section members and their **engagement in section activities**
- Contribute to the **next EPH conference**
- Develop position and expand **EUPHA-HTA section advocacy**

# IDEAS/PROPOSALS

 **Tools/strategies to improve communication and collaboration among members**

 **Issues to address next year**

- Priorities for HTA doers/users in the field of public health
- Horizon scanning
- HTA of organizational models
- Expand on previous work in terms of the role of HTA to preparedness

# THANK YOU
