Subject Application for the position of EUPHA-SSWH President

Dear Members of the EUPHA Office,

It is with great enthusiasm that I apply for the position of president of the EUPHA Section Social Security Work and Health (SSWH). As current vice-president (since 2016) and longstanding member of the SSWH steering committee (since 2014), I am honored to hand in my application for this position. Given my expertise in the fields of work and health, epidemiology, social security and disability prevention as well as many years of experience in international, interdisciplinary research and collaboration with stakeholders from policy and practice in public and occupational health, I am convinced that I will be able to meet the expectations for the future SSWH president.

My main interests include the epidemiology of work and health as well as the prevention of work disability. My current research activities focus on adding a life course perspective to work and health research, in particular on mental health and work challenges to support young adults transitioning into work; and on translating findings into relevant policy and practice measures to make a difference in achieving healthy working lives. I am involved in collaborative research projects on labour market experiences and health in Denmark, Sweden, Germany and Canada.

In sum, the EUPHA SSWH presidency position would be a special opportunity to take the next step in the outstanding international and interdisciplinary environment of the EUPHA.

Sincerely,

Ute Bultmann
Professor of Work and Health
