Róisín Murphy rmurphy@higa.ie

Marija Jevtic EUPHA ENV

Colwyn Jones

Annual report

The annual report and activities of the section are presented and commented.

Suggestions from participants

Carla suggests to improve the networking and the background of the individual participants of the sections.

Alberto asks whether it is possible to customize the website.

Urska suggest to improve meetings and calls (once each 2 months).

Dilek agrees with Urska to increment the number of meetings more structured.

The group discuss about alternatives to better communicate to the members.

Ideas for workshop activities next year

Some topics have been proposed for potential interest: global prospective on infodemics regarding nutrition during the COVID period; food industry and missing information on nutrition; regulation on labelling and marketing; role of plant-based diets and their impact on human health and their potential to improve planetary health.

The meeting concluded with the agreement that restricted and more active groups are needed to improve engagement and activities.
