#ephvienna #5P – The State of e-Health and m-Health in Europe – eHealth Week 2016 Experience - @stefanbuttigieg
What is eHealth?
eHealth involves a **broad group of activities** that use electronic means to deliver **health-related information, resources and services**: it is the use of information and communication technologies (ICT) for health.
FROM INNOVATION TO IMPLEMENTATION

eHealth in the WHO European Region
eHealth within the European Region

• EU Commission
  • eHealth Action Plan 2012-2020

• WHO
  • 2016 to 2020
    • Innovation to Implementation Plan

• HIMSS Europe
What about mHealth?
mHealth

• EU mHealth App Assessment Guidelines
  • Focus on Data Privacy
How do they relate to Public Health?
"Digital Health is the new Public Health" - we MUST use new tools to move forward! That was one of my messages in today's panel at #EHFG2016
What should we look out for?
Digital Health – 2017 & Onwards
Events from November 2016 onwards

• World of Health IT
  • November 2016 – Barcelona

• ISFTeH

• Informatics for Health 2017
  • 24th to 26th April 2017 – Manchester
Two Major Themes

• Giving European Citizens access to their personal health data
• Improving public health through better use of clinical data
Thank you for your time!
eHealth Week
